

Reverse Logistics Tips from the Pros in Singapore

Contributed by Paul Rupnow
Saturday, 10 December 2005

The Asia Pacific region is a complex market with diverse cultures and a large geographic size. These features present some very unique Reverse Logistics challenges.

I have just returned from the Reverse Logistics Conference & Expo in Singapore hosted by the Reverse Logistics Association.

This show featured a collection of great speakers who shared with us their data, experiences and advice on Reverse Logistics, with an Asian Pacific twist.

I have created a list of some of the tips I picked up at the show with a goal of assisting you to improve your Reverse Logistics operations, whether you are an OEM, ODM, distributor or a 3rd party service provider. I have assembled some tips and wisdom from Dell, Alcatel, Chungco Technology, Microsoft Asia Pacific Region and D.F. Blumberg Associates.
